KORAK 1

Prvo stavite krajnje dijelove na donje krajeve stupaca.

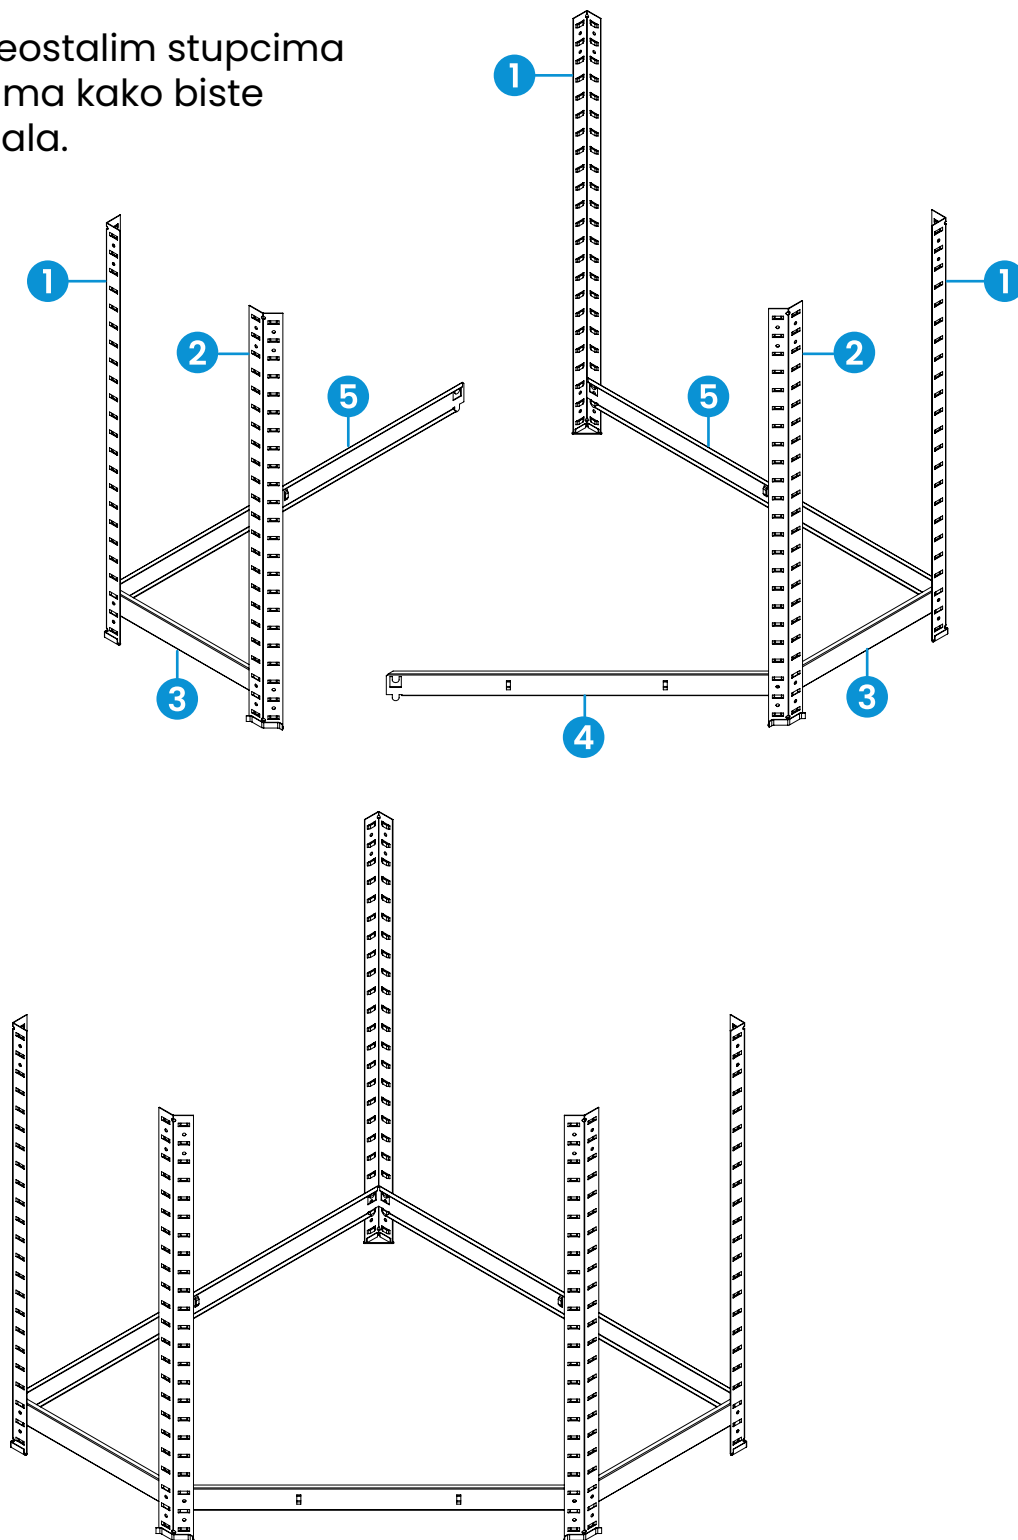

**KORAK 2**

Naslonite dva stupca jedan uz drugi na zid i spojite ih kraćim bočnim dijelovima tako da umetnete kuka bočnih dijelova u uške na stupcima. Možete koristiti gumenu čekić. Pazite da donji bočni dio bude minimalno 90 mm od tla!

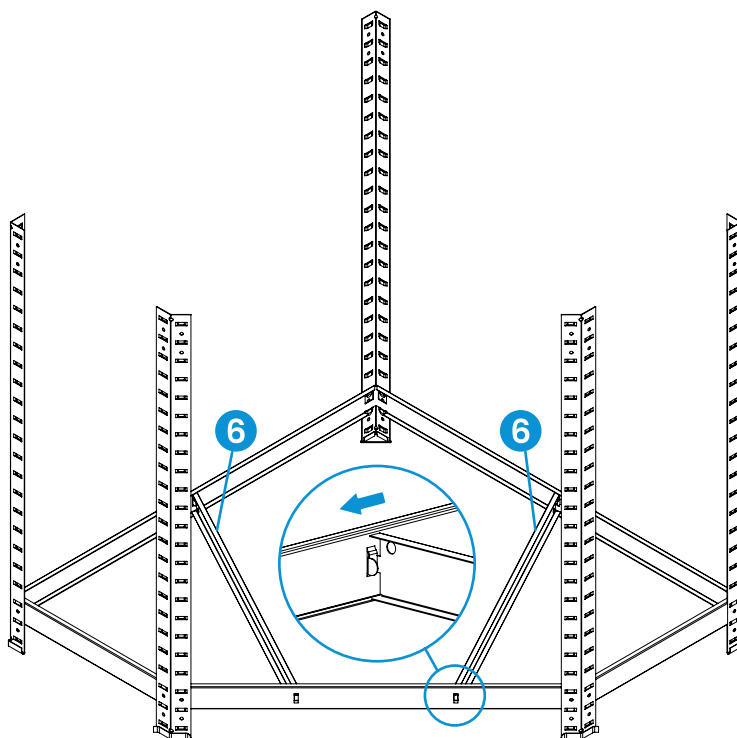

KORAK 3

Isto ponovite s preostalim stupcima i bočnim stranicama kako biste formirali okvir regala.

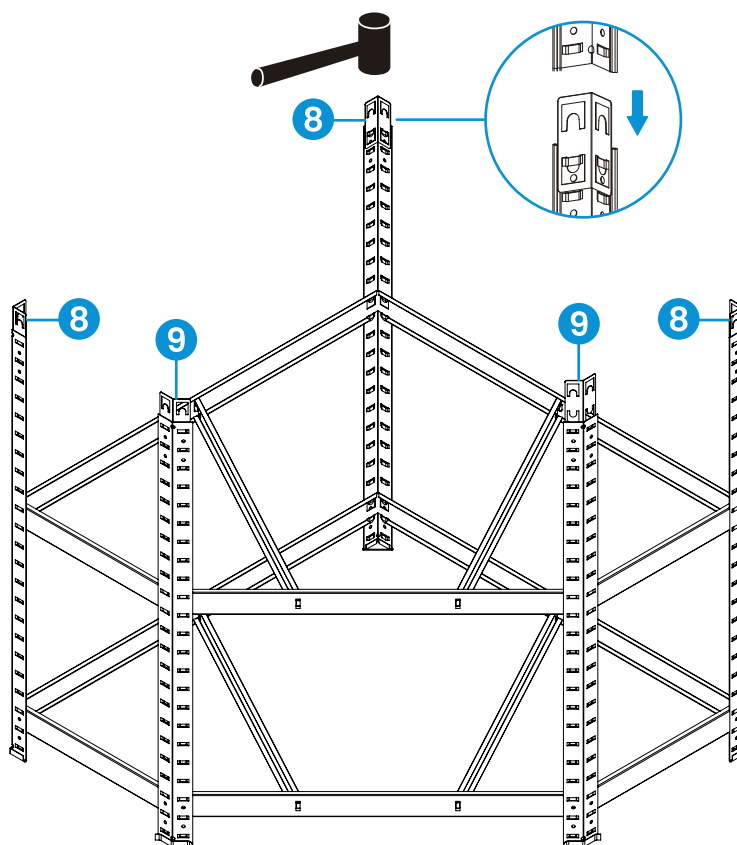

KORAK 4

Sada umetnite polične oslonce u formirani okvir regala. Kukice na krajevima oslonaca savijte pod pravim kutom i spojite svaku dvije suprotne duge bočne stranice tako da umetnete oslonac savijenim kukicama u uške na bočnim stranicama. Zatim kukice savijte odvijačem kako se ne bi izvukle.

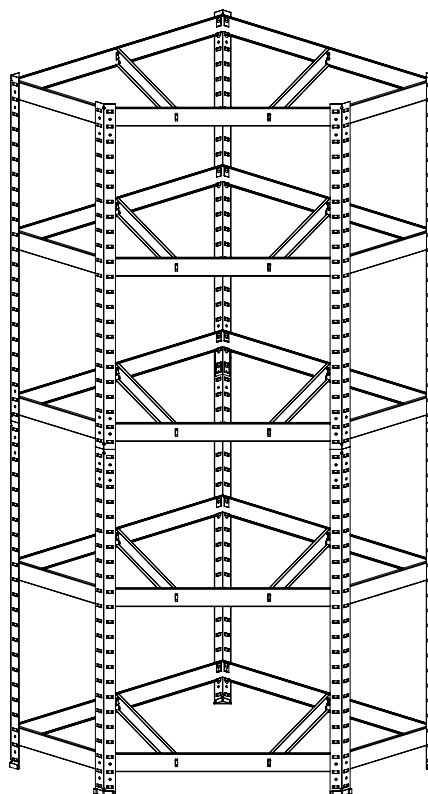

**KORAK 5**

Kada je donji dio gotov, umetnite spojnice u gornje krajeve stupaca, na njih pričvrstite gornje stupce i zakucajte ih do kraja gumenom čekićem.

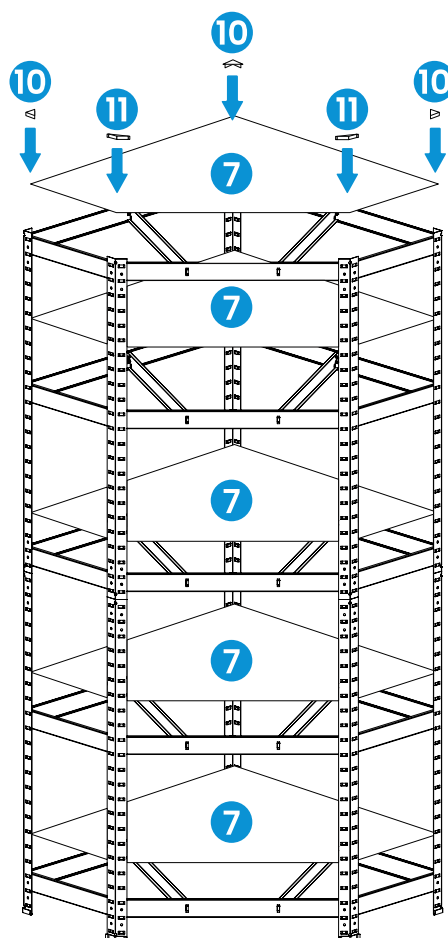

KORAK 6

Sada spojite gornje stupce bočnim dijelovima kao što ste to radili s donjim dijelom.

**KORAK 7**

Na kraju položite drvene police na bočne dijelove i stavite krajnje dijelove na gornje krajeve stupaca. Za vašu sigurnost također preporučujemo pričvršćivanje regala na zid pomoću vijaka i tiple.

KORAK 8

I to je to! Preporučujemo da regal pričvrstite na zid i, u slučaju više regala, spojite ih zajedno radi maksimalne stabilnosti.
